

# A project proposal for CSER

Mike Godfrey  
Ric Holt  
Roche Pharmaceuticals

- Adoption
- Centric
- Networking
- Environments

**ACNE**

## Background

- Network “pores” become clogged
- Preventative maintenance not regularly practised
  - “cleansing”
- Use of email just spreads the problems around
  - *i.e.*, the “POP” protocol

## Proposed research

- Usual layered approach
  - Apply “cover-up”, deny problem exists
- Apply a “transparent solution”
  - Clear subsystem interconnection language  
aka “CLEAR-SIL”
- Wait until it just goes away
- Stop eating chocolate and French fries
  - It will clear up your spots too.
